SUMMARY

The program started with a welcome note addressed by Dr. Anuradha Nemane and Dr. Saumil Sampat.

This program is a first of its kind organised by the faculty of Department of prosthodontics, YMT Dental College and Hospital Kharghar, Navi Mumbai. It's the first institute to perform a live surgery using this technique which is streamed online with pan India coverage.

The research team, headed by Dr. Saloni Mistry, head of department and Dr. Omkar Shete with Dr. Ishan Kadam guided through the virtual session. They have dedicated the past year working with this technology meticulously, documenting their findings and insights.

Initially immersive webinar was conducted by Dr. Saloni Mistry with introduction on “No Drill Protocol i.e. Magnetic Dynamic Technology” and its comparison with the conventional protocol and minimizing bone healing during osteotomy. Then the live demonstration was started by Dr. Ishan Kadam and Dr. Omkar Shete under the guidance of Dr. Saloni Mistry. Surgery comprised of sinus floor elevation with sequential magnetic mallets, graft and Implant placement in the region of 16. Surgery dwelled the participants into the nuances of this procedure, exploring this new technique and expanding our base of knowledge in implant dentistry.

Vote of thanks was offered to our educational and research partner i-Fix, official media partner Dentist Channel Online for generously contributing their resources towards this event.

INTRODUCTION :

Research methodology is a way of explaining how a researcher intends to carry out their research. Basic research is all about information-gathering and answering the What, Why, and How research questions. It involves learning the facts about a subject, finding out why things happen, perhaps by investigation or observation, and then using this expanded knowledge to better understand the topic.

An education colored by research is one way of achieving the intellectual rigor necessary for the professional.
